

About us: B&S Site Development is more than just another construction company. We are a family of unique individuals committed to our culture, our values, and each other. We believe in making our own luck and creating our own opportunities. B&S Site Development accomplishes this by constantly innovating, finding ways to create new value and seizing new opportunities. We are a leading site development contractor that specializes in mission critical and large-scale commercial projects that focus on customer relationships and client satisfaction.

We have offices in Manassas, VA; Richmond, VA; Columbus, OH; Atlanta, GA and projects in 5 states (VA, PA, MD, OH, IN). We have been in business for over 20 years and have become the leading site contractor for the data center industry. We work on parcels ranging from 20-100+ acres.

Job Title: Project Engineer

Project Engineers manage the planning and processes of a project and coordinate responsibilities with field managers to ensure the project is completed efficiently and successfully. They work as a team with a Project Manager on multiple site development projects. Project Engineers are expected to have regular interactions with the field personnel and visit the project sites to gauge progress, manage material deliveries, and generally support the successful completion of the project. The day-to-day duties and responsibilities may vary depending on the type of industry, company or project they're working on, but typically include the following:

Project Engineer Responsibilities:

- Conduct regular meetings with clients to ensure clarification and meet specific requirements in a timely manner.
- Maintain budgets and adjust according to needs as they arise.
- Track performance and analyze the completion of key goals.
- Document and report project progress to stakeholders and clients.

Qualifications:

- Bachelor's or Master's of Science in Civil Engineering, Construction Management, Architecture, or other related discipline required
- Organization and problem-solving skills
- Ability to use specialized software for collaboration and time management, including Office, Bluebeam and Excel

PROJECT ENGINEER

- Strong time management and analytical skills
- Firm understanding of complex mathematical concepts
- Proven leadership skills
- Strong communication skills
- OSHA 10/30 is a plus
- Project Management Professional (PMP) certification, Certified Associate in Project Management (CAPM), is a plus
- Minimum of 2 years of construction management experience in estimating, operations and/or engineering required.
